

Supply management: *What it means at different levels*

Niek Koning

Getting a better price for the *same*
productive activity *without this*
improvement being eroded if other
farmers do the same thing

*Bulking,
grading &
storing*

Means

Local farmer
groups

Examples

Raiffeisen cooperatives
(Western countries)

Farmer self help groups
(Africa)

Effects

Moves local prices towards
global level, but not beyond
it

Means

*Bulking,
grading &
storing*

*Farmer
strikes*

Local farmer groups

Plowing up
actions, supply
boycotts etc.

Examples

Raiffeisen cooperatives (Western
countries)

Farmer self help groups (Africa)

Tobacco strikes US early
20th century

Cocoa strikes West Africa
1930s

European milk strike

Effects

Moves local prices towards global
level, but not beyond it

Cannot long be maintained
→ means for political
pressure rather than
economic tool

	Means	Examples	Effects
<i>Bulking, grading & storing</i>	Local farmer groups	Raiffeisen cooperatives (Western countries) Farmer self help groups (Africa)	Moves local prices towards global level, but not beyond it
<i>Farmer strikes</i>	Plowing up actions, supply boycotts etc.	Tobacco strikes US early 20 th century Cocoa strikes West Africa 1930s European milk strike	Cannot long be maintained → means for political pressure rather than economic tool
<i>Protection</i>	Tariffs, non-tariff barriers, state trade monopolies + <i>export subsidization if country is net-exporter</i>	Western countries Asian Green Revolution countries	Effect on farm-gate prices depends on local organization Affects other countries through import substitution or dumping <i>Export subsidization is expensive!</i>

	Means	Examples	Effects
<i>Bulking, grading & storing</i>	Local farmer groups	Raiffeisen cooperatives (Western countries) Farmer self help groups (Africa)	Moves local prices towards global level, but not beyond it
<i>Farmer strikes</i>	Plowing up actions, supply boycotts etc.	Tobacco strikes US early 20 th century Cocoa strikes West Africa 1930s European milk strike	Cannot long be maintained → means for political pressure rather than economic tool
<i>Protection</i>	Tariffs, non-tariff barriers, state trade monopolies <i>+ export subsidization if country is net-exporter</i>	Western countries Asian Green Revolution countries	Effect on farm-gate prices depends on local organization Affects other countries through import substitution or dumping <i>Export subsidization is expensive!</i>
<i>Private cartelization</i>	Cooperative monopolies	Sapiro movement (US, 1920s)	Success precluded by free rider problem

	Means	Examples	Effects
<i>Bulking, grading & storing</i>	Local farmer groups	Raiffeisen cooperatives (Western countries) Farmer self help groups (Africa)	Moves local prices towards global level, but not beyond it
<i>Farmer strikes</i>	Plowing up actions, supply boycotts etc.	Tobacco strikes US early 20 th century Cocoa strikes West Africa 1930s European milk strike	Cannot long be maintained → means for political pressure rather than economic tool

<i>Multilateral managed trade</i>	Trade quotas, international buffer stocks	GATT articles XI, XVI & XX Integrated Program for Commodities (UNCTAD, 1970s)	To be coordinated with energy market regulation when fossil CHs become scarcer

European Milk Board

Means

Examples

Effects

Bulking, grading & storing

Local farmer groups

Raiffeisen cooperatives (Western countries)
Farmer self help groups (Africa)

Moves local prices towards global level, but not beyond it

Farmer strikes

Plowing up actions, supply boycotts etc.

Tobacco strikes US early 20th century
Cocoa strikes West Africa 1930s
European milk strike

Cannot long be maintained → **means for political pressure** rather than economic tool

Protection

Tariffs, non-tariff barriers, state trade monopolies
+ export subsidization if countries export

Western countries
Asian Green Revolution countries

Effect on farm-gate prices depends on local organization
Affects other countries through import substitution or dumping
Export subsidization is expensive!

Private cartelization

Cooperatives

Government (US, 1920s)

Success precluded by free rider problem

Public cartelization

Farmer quotas, acreage idling etc.
Production control through conservation measures

Coffee valorization (Brazil, early 20th century)
Acreage reduction US (before 1996)
Milk quotas EU & Canada

State as organizer or guarantor?
Other countries can free ride

Multilateral managed trade

Trade quotas, international buffer stocks

GATT articles XI, XVI & XX
Integrated Program for Commodities (UNCTAD, 1970s)

To be coordinated with energy market regulation when fossil CHs become scarcer

Means

Examples

Effects

Bulking, grading & storing

Local farmer groups

Western

Moves local prices towards global level, but not beyond it

Farmer strikes

Plowing up actions, supply boycotts etc.

Tobacco strikes US early 20th century

Cannot long be maintained → **means for political pressure** rather than economic tool

Cocoa strikes West Africa 1930s

European milk strike

Protection

Tariffs, non-tariff barriers, state trade monopolies

Western countries

Effect on farm-gate prices depends on local organization

+ export subsidization if countries export

Asian Green Revolution countries

Affects other countries through import substitution or dumping

Export subsidization is expensive!

Private cartelization

Cooperatives, monopolies

Government (US, 1920s)

Success precluded by free rider problem

Public cartelization

Farmer quotas, acreage idling etc.

Coffee valorization (Brazil, early 20th century)

State as organizer or **guarantor?**

Production control through conservation measures

Acreage reduction US (before 1996)

Other countries can free ride

Milk quotas EU & Canada

Multilateral managed trade

Trade quotas, international buffer stocks

GATT articles XI, XVI & XX

To be coordinated with energy market regulation when fossil CHs become scarcer

Integrated Program for Commodities (UNCTAD, 1970s)
